BAN ON THE OF PLASTICS –

Maintaining cleanliness is crucial to leading a good life since it promotes hygiene and, by keeping us both inwardly and externally clean, aids in personality development. PIT made the decision to exclude plastic from the campus. Inside the campus, steel glasses, plates, and spoons are used in place of paper cups, plastic plates, and plastic spoons. Steel is the only material we use. We held a "Plastic Free Zone" to raise awareness among the community at large about the need to stop pollution and leave a clean, green environment for future generations.

Bhopal (M.P.)

LANDSCAPING WITH TREES AND PLANTS -

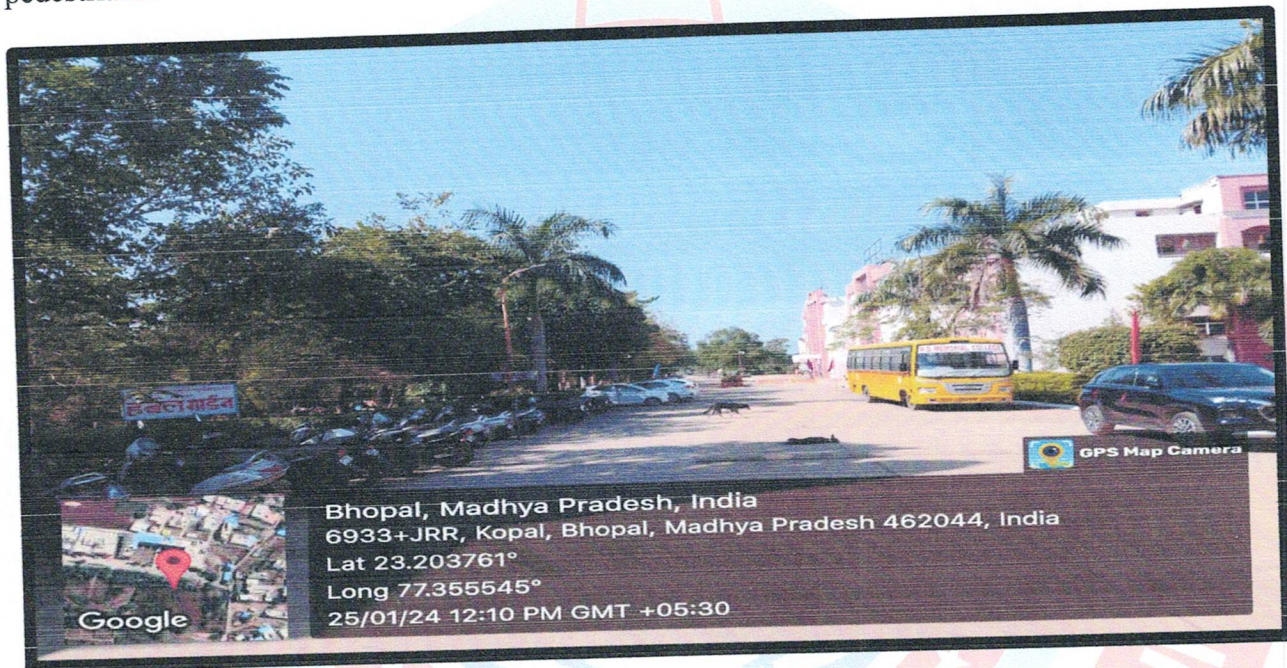

The university keeps a tidy and verdant atmosphere on campus. The Institution protects the environment by creating a separate section for estate maintenance. It uses gardeners and sweepers to keep the plantations and lawn in good condition. Pure oxygen is available throughout the facility because our college is more focused on maintaining a green campus and being environmentally friendly. By adding more trees, the campus has become greener, making it a more pleasant place for faculty members to work and students to learn.

PEDESTRIAN FRIENDLY PATHWAYS – There is ample room on campus for parking cars. The campus's roads are kept up nicely. The campus features walk-friendly walkways that allow pedestrians to traverse safely. Vehicle entry into the campus is restricted. On every bend and crossing into the campus, security personnel are assigned tasks. The campus features a site for sidewalk amenities and landscaping, more space for pedestrian queuing, and more visibility for pedestrians.
